Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The prior art of Heise fails to teach or suggest the instantly claimed invention. Specifically, the prior art fails to teach or suggest a petroleum distillate having a vapor pressure of less than 0.1 mm Hg at 20 degrees C. Heise et al. teach vapor pressures of 1.5 millibar. Additionally, the prior art fails to teach or suggest 20-50% by weight of the glycol ether and at least 10% by weight of the C1-C4 ester having a carbon chain length less than 18 and having a vapor pressure of less than 0.1 mmHg at 20 degrees C.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The rejection of claim 3 as nonenabling is withdrawn in view of applicant's arguments that tripropylene glycol methyl ether has a vapor pressure of 0.03mm Hg, as evidenced by Pearl Paints North America, Inc. and Lyondell Solvent Properties Chart.

3. The rejection of claim 3, under 112, second is withdrawn in view of arguments presented by applicant.

4. The rejection of the claims, as being unpatentable over Heise et al. is withdrawn in view of arguments presented by applicant.
